Hobbies

I have many hobbies and interests. I enjoy snowboarding in the winter, being outside in the summer, and spending time with my friends and family. My biggest enjoyment in life is producing music. I have been producing music for 6 years in my free time. It is my way of destressing and relaxing.

Profile

Motivated student and professional trained in web development and adaptability. Highly effective at doing whatever it takes to complete a task on time. Exceptional interpersonal, communication, multitasking, and technological abilities. Prepared to deliver first rate results to your company.

Employment History

3D Design/Dispatch, Kimball Property Maintenance, Draper

JULY 2020 − PRESENT

Currently, I handle quite a few different tasks. Because of my certification in Excel, I have updated all of our Excel templates with new formulas that are more robust than before. I also have been doing 3D landscape design for our projects, where I go and meet with a client to hear their ideas, measure their property, and then create an exact copy of their property to show them what it will look like upon completion. In the winter, I run the dispatching of our snow plows to make sure every property is completed in a timely manner

Assembly Technician, Best Tugs, Spanish Fork

NOVEMBER 2019 − JULY 2020

I built fully electric airplane tugs from the ground up. The unit I worked on was a fully remote control tug. I built everything on the tug, from wire harnesses and other electrical components to the assembly of each component into the frame. I would then quality inspect each tug and test to make sure it was all done correctly. I learned how to be effective with my time to exceed production goals for the month.
